

Apostila-base definitiva - Professor MaPB - Ingles

Arquivo-fonte: apostilas/magisterio/especificos_mapb_ingles.md

Apostila-base definitiva - Professor MaPB - Ingles

Apresentacao

Esta apostila desenvolve os conhecimentos especificos previstos no Edital 001/2026 para Professor MaPB - Ingles, do 6o ao 9o ano: leitura, vocabulario contextualizado, marcadores discursivos, gramatica, estrutura da lingua, metodologias, habilidades, diversidade cultural e BNCC.

Chapter 1 - Reading comprehension

1.1 Reading is not word-by-word translation

Compreender um texto nao exige traduzir cada palavra. Leitores mobilizam genero, titulo, imagens, palavras-chave, conhecimentos previos e relacoes entre frases.

Strategy	Purpose	Example
Skimming	obter ideia geral	ler titulo, inicio e palavras recorrentes
Scanning	localizar informacao	procurar data ou nome
Prediction	antecipar sentidos	usar titulo e imagem
Inference	concluir pelo contexto	deduzir significado de termo

1.2 Main and secondary ideas

Main idea expresses the central point. Supporting details explain, exemplify or justify it. In proof questions, avoid choosing an isolated detail as the main idea.

1.3 Genres and context

Ads, news reports, emails, instructions, comic strips and articles have different purposes. Genre knowledge guides interpretation.

Questions with comments

1. Scanning is useful when the reader wants:

A) every grammar rule. B) a specific piece of information. C) only pronunciation. D) to rewrite a text.

Answer: B.

2. An inference:

A) must be supported by context. B) is random opinion. C) ignores text. D) replaces reading.

Answer: A.

Chapter summary

Efficient reading uses strategies, genre and context. Main ideas must not be confused with supporting details.

Chapter 2 - Vocabulary, discourse markers and word formation

2.1 Vocabulary in context

Unknown words may be understood by context, cognates, prefixes, suffixes and examples. Cognates resemble Portuguese terms and share meaning; false cognates look familiar but mean something else.

Word	Meaning
actually	na verdade
pretend	fingir
parents	pais
library	biblioteca
sensible	sensato

2.2 Prefixes and suffixes

Element	Meaning	Example
un-	negacao	unhappy
re-	repeticao	rewrite
-er	agente	teacher
-ful	cheio de	helpful
-less	sem	careless

2.3 Discourse markers

Relation	Markers
Addition	and, also, furthermore
Contrast	but, however, although
Cause	because, since
Consequence	therefore, so
Example	for example, such as
Sequence	first, then, finally

Questions with comments

1. "However" generally introduces:

A) contrast. B) cause. C) example. D) sequence.

Answer: A.

2. "Actually" usually means:

A) atualmente. B) na verdade. C) facilmente. D) eventualmente.

Answer: B.

Chapter summary

Vocabulary is read in context. Word formation and discourse markers reveal relationships and improve comprehension.

Chapter 3 - Verb tenses

3.1 Simple present

Uses: routines, facts and general truths.

Teachers plan lessons.

She studies every day.

In third person singular, verbs often receive **-s**. Questions and negatives use **do/does**.

3.2 Present continuous

Structure: **am/is/are + verb-ing**. It commonly indicates actions in progress or temporary situations.

They are reading now.

3.3 Simple past

Regular verbs commonly receive **-ed** ; irregular verbs have specific forms.

She visited the school.

He wrote a report.

Negatives and questions usually use **did** .

3.4 Future forms

Will can express predictions and decisions; **be going to** often expresses plans or evidence-based predictions.

3.5 Present perfect

Structure: **have/has + past participle** . It connects past and present.

They have studied English for three years.

Pegadinha: simple past tends to combine with finished time references: **I visited London in 2020** . Present perfect commonly avoids a finished past time marker.

Questions with comments

1. Correct sentence:

A) She study every day. B) She studies every day. C) She studying every day. D) She do studies.

Answer: B.

2. "They have lived here since 2022" uses:

A) simple past. B) present perfect. C) future. D) imperative.

Answer: B.

Chapter summary

Verb tenses express time and aspect. Form and context must be analyzed together.

Chapter 4 - Voice and reported speech

4.1 Active and passive voice

Active voice highlights agent: **The teacher corrected the tests.**

Passive voice highlights receiver or action: **The tests were corrected by the teacher.**

Passive structure uses **be + past participle** , adjusted to tense.

4.2 Direct and indirect speech

Direct: She said, "I am tired."

Reported: She said **that she was tired**.

Changes may occur in tense, pronouns and time expressions depending on context.

Direct	Reported
today	that day
tomorrow	the next day
yesterday	the day before
here	there

Questions with comments

1. Passive version of "Students read the book":

A) The book is read by students. B) The book reads students. C) Students are book. D) The book reading.

Answer: A.

Chapter summary

Voice changes focus. Reported speech conveys another person's words with adjustments when required.

Chapter 5 - Pronouns, adjectives, adverbs and quantifiers

5.1 Pronouns

Type	Examples
Subject	I, you, he, she, it, we, they
Object	me, you, him, her, it, us, them
Possessive adjective	my, your, his, her, its, our, their
Relative	who, which, that
Indefinite	someone, anyone, nobody

5.2 Adjectives and adverbs

Adjectives characterize nouns: **a clear explanation**. Adverbs often modify verbs, adjectives or other adverbs: **She speaks clearly**.

5.3 Comparatives and superlatives

Form	Example
Comparative	taller than / more interesting than
Superlative	the tallest / the most interesting
Irregular	good, better, the best

5.4 Quantifiers

Many combines with countable nouns; **much**, with uncountable nouns; **some** often appears in affirmative sentences; **any**, frequently in questions and negatives.

Questions with comments

1. Correct option:

A) much books. B) many books. C) many water. D) a water.

Answer: B.

2. Superlative of "good":

A) gooder. B) the best. C) more good. D) the better.

Answer: B.

Chapter summary

Pronouns maintain reference. Adjectives, adverbs, comparatives and quantifiers require attention to function and noun type.

Chapter 6 - Prepositions, phrasal verbs and idioms

Prepositions express relationships of time, place and other meanings.

Context	Examples
Time	at 8 o'clock, on Monday, in May
Place	at school, on the table, in the room

Phrasal verbs combine verb and particle, sometimes producing meaning not predictable word by word: **give up** = desistir; **look for** = procurar; **turn on** = ligar.

Idioms are conventional expressions: **break the ice** means ease initial tension, not physically break ice.

Question with comments

1. "Look for" means:

A) desligar. B) procurar. C) desistir. D) inventar.

Answer: B.

Chapter summary

Prepositions depend on usage patterns. Phrasal verbs and idioms must be interpreted as units.

Chapter 7 - Clauses and conditionals

7.1 Noun, adjective and adverb clauses

Clause	Function	Example
Noun clause	functions as noun	I know that she studies .
Relative clause	characterizes noun	The book that I bought is useful.
Adverb clause	expresses circumstance	I stayed home because it rained .

7.2 Conditionals

Type	Typical structure	Meaning
Zero	If + present, present	general truth
First	If + present, will + verb	real future possibility
Second	If + past, would + verb	hypothetical situation
Third	If + past perfect, would have + participle	unreal past

Examples:

If water reaches 100 graus C, it boils.

If I study, I will learn.

If I had time, I would travel.

If she had studied, she would have passed.

Questions with comments

1. "If I study, I will pass" is:

A) zero conditional. B) first conditional. C) third conditional. D) passive voice.

Answer: B.

Chapter summary

Clauses organize complex sentences. Conditionals express truths, possibilities and hypothetical situations.

Chapter 8 - Teaching English and BNCC

8.1 Four skills and language use

English teaching develops reading, writing, listening and speaking in meaningful practices. Grammar and vocabulary support communication; they should not appear only as disconnected lists.

8.2 Approaches and methodologies

Approach	Focus
Grammar-translation	rules and translation
Direct method	use of target language
Audiolingual	patterns and repetition
Communicative approach	meaningful interaction
Task-based teaching	language use to perform tasks

Methods are historical references, not recipes. Teacher decisions depend on objectives, context and students.

8.3 Culture and citizenship

English is used in diverse contexts around the world. Teaching should avoid assuming one culture or accent as the only legitimate model. Intercultural work compares perspectives and supports citizenship.

8.4 BNCC

In the BNCC, English is situated in the area of Languages. The component emphasizes social practices, interculturality, multiple literacies and English as lingua franca.

8.5 Assessment

Assessment should align with objectives. Reading tasks, oral interaction, writing processes, portfolios and self-assessment reveal different learning dimensions.

Questions with comments

1. Communicative teaching:

A) excludes grammar. B) values meaningful language use. C) uses only translation. D) eliminates planning.

Answer: B.

2. English as lingua franca:

A) recognizes diverse uses in international communication. B) permits only one accent. C) excludes culture. D) restricts language to one country.

Answer: A.

Chapter summary

Teaching English combines skills, language knowledge, interaction, diversity and assessment. BNCC emphasizes social and intercultural practices.

Chapter 9 - Reading practice: context, cohesion and inference

9.1 Reference words

Pronouns and demonstratives maintain cohesion. To understand **it**, **they**, **this** or **those**, the reader identifies the most plausible referent by grammar and meaning.

Example: The students read the article. They discussed it afterwards.

They refers to students; **it** refers to article.

9.2 Logical relationships

Connectors guide comprehension:

Connector	Relationship
however	contrast
therefore	consequence or conclusion
because	reason
although	concession
unless	negative condition
in addition	addition

Example: Although the task was difficult, the students completed it. The sentence contrasts difficulty with successful completion.

9.3 Meaning from context

Suppose a text states: **The path was slippery after the heavy rain, so the hikers walked slowly.** Even if a reader does not know **slippery**, rain and slow walking suggest a surface where people may slide.

Exam tip: do not translate options mechanically. Test each meaning against the surrounding sentence.

Attention box - common exam mistakes

- Searching for a single identical word instead of reading meaning.
- Ignoring pronoun reference.
- Confusing **although** with cause.
- Treating cognates as automatically correct.

Commented questions

1. In **The school bought new computers. They will be installed tomorrow, they** refers to:

A) school. B) computers. C) tomorrow. D) installation.

Answer: B.

2. **Unless you study, you will not improve** expresses:

A) addition. B) negative condition. C) past habit. D) comparison.

Answer: B.

Chapter summary

Text comprehension depends on cohesive references, connectors and contextual inference, not isolated translation.

Chapter 10 - Grammar contrasts that often appear in exams

10.1 Countable and uncountable nouns

Countable nouns can be counted individually: **book/books**, **student/students**. Uncountable nouns are not normally counted without a unit: **information**, **water**, **advice**.

Countable	Uncountable
many books	much information
a few students	a little water
fewer tasks	less time

10.2 Present perfect and simple past

Use simple past for finished events at a defined past time: **She visited London in 2022.** Use present perfect when past action connects to present or time remains open: **She has visited London twice.**

10.3 Gerund and infinitive

Some verbs are commonly followed by **-ing**: **enjoy reading**, **avoid wasting**. Others are followed by infinitive: **want to learn**, **decide to study**. Patterns should be studied in context.

10.4 Relative clauses

Who commonly refers to people; **which**, to things; **that** may refer to people or things in many restrictive clauses.

The teacher who helped me is here.

The book that I borrowed is useful.

10.5 Modal verbs

Modal	Typical meaning
can	ability or possibility
may	possibility or permission
must	strong obligation or deduction
should	advice
might	possibility

Modal verbs are followed by base form: **She can read**, not **she can reads**.

Attention box - common exam mistakes

- Using **informations**.
- Combining **did** with past verb: incorrect **did went**.
- Adding **to** after modal: incorrect **must to study**.
- Translating present perfect by a fixed Portuguese tense without context.

Commented questions

1. Correct sentence:

- A) She gave me an advice.
- B) She gave me some advice.

- C) She gave me advices.
D) She gave an informations.

Answer: B. **Advice** is uncountable.

2. Correct structure:

- A) He must studies. B) He must to study. C) He must study. D) He must studied.

Answer: C.

Chapter summary

Exams frequently test contrasts: countable nouns, tense choice, verb patterns, relatives and modals. Meaning and structure work together.

Chapter 11 - Lesson planning and assessment

11.1 Define a language-use objective

A lesson objective should state what students will do with language. **Learn simple past** is incomplete. A stronger objective: **Read a short biography and identify past events, then write a brief timeline using simple past.**

11.2 Sequence a lesson

1. activate prior knowledge;
2. introduce genre and context;
3. set a reading or listening purpose;
4. guide comprehension;
5. focus on useful language features;
6. propose meaningful production;
7. offer feedback;
8. assess learning.

11.3 Use authentic and adapted texts

Authentic texts circulate socially: posts, advertisements, songs, news reports and instructions. Adapted texts can be useful when aligned with learner needs. The choice depends on objective, not on a simplistic opposition.

11.4 Assess different abilities

Reading comprehension, writing, listening and speaking require suitable evidence. A multiple-choice reading test does not fully measure oral interaction. Formative assessment includes observation, drafts, peer review and self-assessment.

Attention box - common exam mistakes

- Teaching grammar without communicative purpose.
- Using translation as the only procedure.
- Demanding oral production without preparation.
- Assessing skills with mismatched instruments.

What usually appears in exams

- Communicative approach.
- English as lingua franca.
- Multiliteracies and cultural diversity.
- Alignment between objective, method and assessment.

Commented questions

1. A well-designed lesson:

- A) articulates objective, activity and assessment.
- B) uses grammar lists only.
- C) excludes context.
- D) tests speaking only through translation.

Answer: A.

2. An authentic text:

- A) circulates in social practices.
- B) is always too difficult.
- C) must never be adapted.
- D) excludes genre.

Answer: A.

Chapter summary

English teaching becomes meaningful when objectives describe language use, activities create context and assessment matches learning.

Chapter 12 - Verb system in greater depth

12.1 Questions and negatives

English often uses auxiliary verbs. In simple present, use **do/does** ; in simple past, **did** . Main verb returns to base form after auxiliary.

Affirmative	Question	Negative
She studies.	Does she study?	She does not study.
They visited.	Did they visit?	They did not visit.

Common trap: `Did she went?` is incorrect. Use `Did she go?`

12.2 Continuous forms

Present continuous uses `am/is/are + verb-ing`. Past continuous uses `was/were + verb-ing`. Continuous forms typically foreground ongoing or temporary activity.

`They were studying when the lights went out.`

12.3 Present perfect markers

`Since` introduces starting point; `for`, duration; `already`, completed event with present relevance; `yet`, common in questions and negatives; `ever`, experience.

12.4 Future meaning

English expresses future through multiple forms:

- `will`: prediction, spontaneous decision;
- `be going to`: plan or evidence-based prediction;
- present continuous: arranged future event.

Attention box - common exam mistakes

- Keeping past form after `did`.
- Omitting auxiliary in questions.
- Confusing `since` and `for`.
- Assuming future is always formed only by `will`.

Commented questions

1. Correct sentence:

- A) Did he studied yesterday?
- B) Did he study yesterday?
- C) Does he studied yesterday?
- D) He did studied yesterday.

Answer: B.

2. Correct use:

- A) I have lived here since 2020.
- B) I have lived here for 2020.
- C) I lived here since three years.
- D) I am live here.

Answer: A.

Chapter summary

Auxiliaries organize questions and negatives. Tense choice depends on form and intended meaning.

Chapter 13 - Structure of complex sentences

13.1 Coordination and subordination

Coordinating conjunctions connect elements of similar status: **and** , **but** , **or** , **so** . Subordinators introduce dependent clauses: **because** , **although** , **if** , **when** .

She studied, but she was tired.

She studied although she was tired.

13.2 Relative clauses

Restrictive clauses identify a referent: **Students who revise learn more.** Non-restrictive clauses add information and are separated by commas: **My teacher, who lives nearby, walks to school.**

13.3 Conditionals and meaning

Conditionals must be interpreted, not classified only by formula. Zero conditional expresses regular relationship. First conditional presents real possibility. Second and third construct hypothetical meanings.

13.4 Passive voice in context

Passive voice is useful when action or affected entity deserves focus or when agent is unknown: **The school was built in 1990.** It is not simply mechanical inversion.

Attention box - common exam mistakes

- Using comma without understanding clause role.
- Confusing **although** and **because** .
- Mixing conditional patterns without intended meaning.
- Transforming passive without adjusting tense.

Commented questions

1. In **The book, which was expensive, is useful** , relative clause:

- A) adds non-restrictive information.
- B) identifies one book among many necessarily.
- C) expresses condition.
- D) is passive future.

Answer: A.

Chapter summary

Complex sentences express addition, contrast, cause, condition and characterization. Structure serves meaning.

Chapter 14 - Intercultural teaching and multiliteracies

14.1 English as lingua franca

English circulates among speakers with diverse linguistic repertoires. Teaching should prepare students to communicate and interpret varied uses, rather than imitate a single ideal accent.

14.2 Multiliteracies

Texts combine words, images, sound, layout and links. Reading a social media post, infographic or video requires attention to multiple modes. Digital texts also demand critical evaluation of source and purpose.

14.3 Cultural diversity

Culture is not a list of holidays from a small set of countries. It includes identities, values, everyday practices and perspectives. Comparison must avoid stereotypes.

14.4 Classroom application

A project can compare public service campaigns in English from different contexts. Students analyze genre, images, commands, audience and cultural choices, then produce their own campaign.

Questions with comments

1. Multiliteracies:

- A) consider multiple modes and media.
- B) reduce reading to translation.
- C) exclude images.
- D) prohibit digital texts.

Answer: A.

Chapter summary

English teaching develops critical participation in diverse social practices. Interculturality and multiliteracies are central.

Chapter 15 - Phrasal verbs and idiomatic expressions

15.1 Meaning as a unit

A phrasal verb combines a verb and one or more particles. Meaning may be transparent or idiomatic. **Sit down** is relatively transparent; **give up** cannot be understood simply by translating each word.

Phrasal verb	Meaning	Example
look for	procurar	I am looking for my keys.
find out	descobrir	She found out the answer.
turn on	ligar	Turn on the computer.
turn off	desligar	Turn off the lights.
give up	desistir	Do not give up.
look after	cuidar de	He looks after his brother.
pick up	pegar, buscar	I will pick you up.
carry on	continuar	Please carry on.

15.2 Separable phrasal verbs

Some phrasal verbs allow object between verb and particle:

Turn off the light.

Turn the light off.

Turn it off.

With pronoun object, separation is required in this pattern. Others, such as **look after**, are not separable: **look after the child**.

15.3 Idioms

Idiomatic expressions have conventional meanings:

Idiom	Meaning
break the ice	iniciar interacao de forma mais confortavel
piece of cake	algo muito facil
under the weather	indisposto
hit the books	estudar intensamente

Attention box - common exam mistakes

- Translating particles literally.
- Separating inseparable verbs.
- Writing **turn off it** instead of **turn it off**.
- Interpreting idiom word by word.

Commented questions

1. Correct option:

A) Turn off it. B) Turn it off. C) Look the child after. D) Give the project up it.

Answer: B.

2. **Find out** usually means:

A) continuar. B) descobrir. C) desligar. D) desistir.

Answer: B.

Chapter summary

Phrasal verbs and idioms must be interpreted as lexical units. Some particles allow separation; others do not.

Chapter 16 - Reported speech in context

16.1 Direct and reported statements

Direct speech reproduces words: **Ana said, "I am tired."**

Reported speech conveys content: **Ana said that she was tired.**

When reporting from a later perspective, tense may shift:

Direct	Reported
simple present	simple past
present continuous	past continuous
simple past	past perfect
will	would
can	could

16.2 Questions

Reported questions use statement order:

Direct: He asked, "Where do you live?"

Reported: He asked where I lived.

There is no auxiliary inversion in the reported clause.

16.3 Commands and requests

Commands often use infinitive:

The teacher said, "Open the book."

The teacher told the students to open the book.

16.4 Context matters

Backshift is not mechanical in every situation. If statement remains generally true or reporting context is immediate, forms may remain. Exams usually test standard pattern, but meaning guides analysis.

Attention box - common exam mistakes

- Maintaining question order in reported questions.
- Confusing **said** and **told**: **told** commonly requires object.
- Forgetting changes in pronouns or time markers.
- Applying tense shift without reading context.

Commented questions

1. Reported form of **She said, "I will study"**:

A) She said that she would study. B) She said that she will studied. C) She told that study. D) She said would studied.

Answer: A.

2. Correct reported question:

A) He asked where did I live. B) He asked where I lived. C) He asked where do I live. D) He asked where lived I.

Answer: B.

Chapter summary

Reported speech adjusts tense, pronouns, time references and sentence order according to context.

Chapter 17 - Conditionals in greater depth

17.1 Zero conditional

Used for general truths or regular consequences:

If water reaches 100 graus C at sea level, it boils.

Both clauses commonly use simple present.

17.2 First conditional

Used for realistic future possibility:

If students revise, they will feel more confident.

Condition clause generally uses present, not will.

17.3 Second conditional

Used for hypothetical or less likely present/future situations:

If I had more time, I would read more.

17.4 Third conditional

Used for unreal past:

If she had studied, she would have passed.

The action did not happen as imagined.

17.5 Unless

Unless often means if not:

Unless you practice, you will not improve.

If you do not practice, you will not improve.

Attention box - common exam mistakes

- Using will in the if clause of standard first conditional.
- Confusing second and third conditional.

- Forgetting past participle in third conditional.
- Treating **unless** as addition.

Commented questions

1. Third conditional:

- A) If she studies, she will pass.
- B) If she studied, she would pass.
- C) If she had studied, she would have passed.
- D) If she study, she pass.

Answer: C.

2. **Unless** usually expresses:

- A) negative condition. B) comparison. C) past habit. D) addition.

Answer: A.

Cumulative review

1. **Look after** means: A) cuidar de. B) desligar. C) descubrir. D) desistir.

Answer: A.

2. Reported question: A) She asked where I worked. B) She asked where did I work. C) She asked where work I. D) She asked where do I worked.

Answer: A.

3. First conditional: A) If it rains, we will stay home. B) If it rained, we would have stayed. C) If rains, stay. D) If it will rain, we stay.

Answer: A.

Chapter summary

Conditionals express truths, realistic possibilities and hypothetical meanings. Form must be read together with time and intention.

Chapter 18 - Commented reading workshop

18.1 Text

Many schools are using community gardens as learning spaces. Students observe plant growth, collect data and discuss healthy food. Although gardens require planning, they can connect science, cooperation and local knowledge. Teachers report that students often become more engaged when they see the results of their work.

18.2 Guided analysis

Main idea: community gardens can become meaningful learning spaces.

Supporting details: students observe growth, collect data and discuss food; gardens connect subjects and cooperation.

Connector: **although** introduces contrast between need for planning and educational benefits.

Reference: **they** in **when they see** refers to students.

18.3 Questions with comments

1. The text mainly argues that:

- A) gardens replace teachers.
- B) community gardens may support learning.
- C) planning is unnecessary.
- D) students dislike practical activities.

Answer: B. The paragraph presents benefits while acknowledging planning.

2. **Although** expresses:

- A) contrast. B) cause. C) sequence. D) example.

Answer: A.

18.4 Vocabulary in context

Growth means development; **collect data**, gather information; **engaged**, involved or interested. Context narrows meaning.

Chapter summary

Reading combines main idea, details, reference, connectors and contextual vocabulary.

Chapter 19 - Vocabulary development strategies

19.1 Word families

Recognizing related words improves reading:

Base	Related words
educate	education, educational, educator
develop	development, developmental
communicate	communication, communicative
create	creation, creative, creativity

19.2 Affixes

Prefixes and suffixes provide clues:

- **unhappy** : **un-** suggests negation;
- **rebuild** : **re-** suggests repetition;
- **careless** : **-less** suggests absence;
- **careful** : **-ful** suggests presence.

19.3 Collocations

Words frequently occur together: **make a decision** , **take a test** , **heavy rain** , **strong argument** . Learning combinations avoids literal Portuguese transfer.

19.4 False cognates

False cognates deserve contextual review: **actually** , **pretend** , **library** , **parents** , **sensible** , **eventually** .

Questions with comments

1. **Careless** means:

A) cuidadoso. B) descuidado. C) cuidador. D) cuidado.

Answer: B.

2. Natural collocation:

A) do a decision. B) make a decision. C) create a decision always. D) perform decision.

Answer: B.

Cumulative review expanded

1. In reading, **however** often signals: A) contrast. B) example. C) time only. D) pronoun.

Answer: A.

2. **Parents** : A) parentes. B) pais. C) professores. D) alunos.

Answer: B.

3. **Rebuild** : A) construir novamente. B) destruir. C) desistir. D) buscar.

Answer: A.

Chapter summary

Vocabulary grows through context, word families, affixes and collocations. Translation alone is insufficient.

Final review and commented test

1. "Since" in present perfect may introduce: A) starting point. B) comparison. C) superlative. D) object pronoun.

Answer: A.

2. Correct option: A) more tall. B) taller than. C) tallest than. D) the taller of all.

Answer: B.

3. Relative pronoun for people: A) who. B) where. C) much. D) at.

Answer: A.

4. "Give up": A) procurar. B) desistir. C) ligar. D) escrever.

Answer: B.

5. Reading instruction should: A) focus only on literal translation. B) develop strategies and contextual comprehension. C) ban genres. D) exclude inference.

Answer: B.

Editorial audit and situational test

Alignment matrix

Audited axis	Developed coverage
Reading, genres, ideas and inference	Chapters 1, 9 and 18
Vocabulary, markers, affixes, idioms and phrasal verbs	Chapters 2, 6, 15 and 19
Verb tenses, voice and reported speech	Chapters 3, 4, 12 and 16
Pronouns, modifiers, quantifiers, clauses and conditionals	Chapters 5, 7, 10, 13 and 17
Teaching, skills, culture and BNCC	Chapters 8, 11 and 14

Situational test

1. A student reads **Although the activity was difficult, the class completed it.**

Although signals:

A) contrast. B) cause. C) addition. D) time only.

Answer: A.

2. Correct reported question:

A) She asked where did he work. B) She asked where he worked. C) She asked where does he work. D) She asked where worked he.

Answer: B.

3. A lesson uses an infographic, a short video and a campaign post. This supports:

A) multiliteracies. B) translation only. C) one accent only. D) no context.

Answer: A.

4. A learner writes **Did she went yesterday?** . The correct feedback is:

A) use **Did she go yesterday?** because auxiliary carries past marking. B) remove auxiliary and keep question unchanged. C) add **to** . D) use present perfect always.

Answer: A.

5. In **Unless you revise, you will not improve** , **unless** means:

A) if not. B) although. C) because. D) in addition.

Answer: A.

Editorial reading note

Editorial note: the workbook covers the official axes and can move to final editorial reading. The final pass should check balance between English examples and Portuguese explanations for the intended learner profile.

Item-by-item audit

Official item	Editorial status
Reading, genres, main ideas, details and inference	developed
Contextual vocabulary and discourse markers	developed
Verb tenses, active/passive voice and reported speech	developed
Pronouns, modifiers, comparatives, quantifiers and prepositions	developed
Prefixes, suffixes, phrasal verbs, idioms and false cognates	developed
Clauses and conditionals	developed
English teaching, skills, cultural diversity and BNCC	developed

Essential references for editorial reading

- BRASIL. Ministerio da Educacao. **Base Nacional Comum Curricular** - Lingua Inglesa.
- CELCE-MURCIA, Marianne; LARSEN-FREEMAN, Diane. References on English grammar.
- SWAN, Michael. Practical English Usage.
- MURPHY, Raymond. English Grammar in Use.
- HARMER, Jeremy. References on English language teaching.
- Documents and studies on English as a lingua franca, interculturality and multiliteracies aligned with BNCC.

Consolidated answer key for editorial checking

Section	Answers
Final review and commented test	1-A; 2-B; 3-A; 4-B; 5-B
Extra cumulative review	1-A; 2-A
Situational test	1-A; 2-B; 3-A; 4-A; 5-A

Editorial checking note: chapter-level explanations remain the primary learning resource. This answer key supports final proofreading.

Checklist
